- 8 Right foot stomp down next to left foot
- & Hold clap hands once

REPEAT

The basic sequences that make up this dance are not particularly difficult; what creates the three-alarm fire of confusion is the interplay of call and response and the fact that this dance faces corners as well as walls-and that the wall/corner sequences changes three times (Wall, Corner, Corner; Corner, Wall, Corner; Corner, Corner, Wall).

- 1 First time through: wall, corner 1, corner 2
 - 2 Second time through: corner 2, wall, corner 1
 - 3 Third time through: corner 1, corner 2, wall
- Repeat sequence until song ends

Tip 0: Although there are 128 beats of music to the complete sequence, each person only has to learn 96 counts, the remaining 32 counts being spent waiting for the other side to finish either their call or response. Because of the speed of the music used for this dance, I have counted it at half-time, therefore $128 = 64$. And each person only has to learn 48 counts!

Tip 1: Before you learn this dance, walk everyone through the pattern this makes on the floor. Do this as a line dance so everyone learns the basic structure of this dance. (Use the Walk-Through Pattern, below.) Do three repetitions ((First Time) Wall, Corner 1, Corner 2; (Second Time) Corner 2, Wall, Corner 1; (Third Time) Corner 1, Corner #, Wall) so everyone sees the overall structure. Do this until everyone is comfortable with the structure of the dance.

Tip 2: Once you have done Tip 1, above, make two opposing lines (contra). Now walk everyone through the dance so that they can see how both sides intermingle. Again, do this until everyone is satisfied they are comfortable with this structure and can learn the dance with a minimum of fuss.

Tip 3: Ignore these tips at your own risk...
