RESTART

On wall 2, facing back wall at the sways on count 14. Take weight on to right foot for count 16. Start the dance again on count 1, doing a left basic. You will not be doing the ¼ turn as the dance would normally begin because you are already facing the wall

TAG

On wall immediately after the restart, during counts 30-31, the sway section (facing front wall), add 4 more counts of sways (now 6 sways total) and continue starting again as normal on 8&1
Music is pretty much not danceable after 3:30 of the song. This is due to a rhythm change. I suggest fading out the music here, it is a good place
