### **ADDITIONAL PATTERN FORMATION NOTES:**

- Set 1 Dancers move into center of track then turn to face each other, which creates a "back to back" appearance on floor. There should now only be 1 center row, with rows facing opposite  
Set 2 Dancers remain facing in pairs in center of track, facing side walls  
Set 3 Dancers move out of center track, pass along side each other, then move back into track facing someone new  
Set 4 Dancers remain facing in pairs in center of track, facing side walls  
Set 5 Dancers remain in center track. When connecting during bumps (encouraged), arms should move accordingly

- Set 6 Dancers execute box pattern going closely around each other, to end where they started. The drawing together of the non weighted foot before stepping keeps each persons feet in their own dance space
- Set 7 Dancers move to original contra track/row distance apart, again in 2 separate rows/lines
- Set 8 Dancers should be back to original floor starting row position, on opposite side facing "their" new wall
- Set 9 Dancers move in opposite directions, then return to their starting point after completing "Cat Walks"
- Set 10 Dancers move in opposite directions, then return to their starting point after completing "Pigeon Toes"
- Set 11 Dancers move in opposite directions, then return to their starting point after completing "Crab Walks"
- Set 12 Dancers move in opposite directions, then return to original start of dance after completing "Hammertime"
