# The Gilley-1

Count: 32 Wand: 0 Ebene:

Choreograf/in: Jack Wagner (USA) & Sue Wagner (USA)

Musik: Stagger Lee - Mickey Gilley

## TOE, HEEL, CROSS-STEP, CROSS-STEP

- With weight on left foot, touch-tap right toe in front of left foot, angling toe & body slightly to
  - left side (almost a 45 degree angle)
- 2 Shifting angle of body to right side (almost a 45 degree angle to right of original line-of-

dance), touch-tap right heel in front, also angling right foot to right side

During counts #1 and #2, ball of left foot remains in place while leg heel shifts from one side to the other to help angle the body in the appropriate direction-often called a Sugarfoot movement.

- 3 Step forward and across in front of left foot with right foot
- 4 Cross-step with left foot behind right foot, by sliding left foot forward, hooking left instep behind right heel creating scissors steps

#### STEP, CROSS-STEP

- 5 Step forward with right foot
- 6 Continue scissors steps by cross-stepping with left foot behind right foot, again sliding left foot forward, hooking left instep behind right heel (weight on left foot)

## SIDE, CROSS-STEP, SIDE, (TURN) HEEL

- 1 Step to right side with right foot
- 2 Cross-step to right side in front of right foot with left foot
- 3 Step to right side with right foot
- Pivoting ¼ turn to left while on ball of weighted right foot (facing new direction), touch-tap left heel forward-the dance accent is 1st to turn, then heel tap

## (TURN) SIDE, CROSS-STEP, SIDE, STOMP

- Pivoting ¼ turn to right while on ball of weighted right foot (facing original direction), step to left side with left foot-the dance accent is 1st to turn, then side-step to left
- 2 Cross-step to left side behind left foot with right foot
- 3 Step to left side with left foot
- 4 Stomp right foot (without shifting weight) beside left foot in place

### KICK, BALL CHANGE (IN PLACE-STEP, STEP)

- With weight on left foot, kick forward with right foot & using only ½ count of music, return right foot beside left foot, shifting weight to ball of right
- With left foot still in place, use second ½ count of music to shift weight from ball of right foot back to ball of left

During the 'ball-change', it may help in keeping rhythm by slightly lifting one foot off the floor as weight is shaped to the other foot.

## STEP, CROSS-STEP, STEP, (TURN) STEP-BACK

- 1 Step forward with right foot
- Again use scissors steps to cross-step with left foot behind right foot by sliding left foot forward, hooking left instep behind right heel (weight on left foot)
- 3 Step forward with right foot
- Pivoting ½ turn to right side while on weighted right foot, (facing new direction) step backward with left foot

| 1               | With weight still on left foot, bring right foot out slightly to right side &. Forward, centering weight on both feet, then throwing right hip out to right side & returning hip center (all this on 1 count of music!) |
|-----------------|---|
| 2               | Again throw right hip out to right side k return hip center   |
| 3               | Change by throwing left hip out to left side & returning hip center   |
| 4               | Again throw left hip out to left side & return hip center   |
| ROCK, STEP      | , STEP, CROSS-STEP, STEP (TURN)   |
| 1               | Rock-step backward on right foot, leaving left leg extended forward   |
| 2               | Rock-step forward on left foot  |
| 3               | Step forward with right foot  |
| 4               | Scissors-stepping once more, cross-step with left foot behind right foot by sliding left foot forward, hooking left instep behind right heel (weight on left foot)  |
| 5               | Step forward with right foot, then pivoting $\frac{1}{4}$ turn to right side, right foot facing new direction   |
| STEP (TURN)     | ), STEP (TURN), STEP (TURN)   |
| 1               | With weight on right foot, cross-step with left foot in front of right, pivoting 1/3 turn to right  |
| 2               | Cross-step with right foot behind weighted left foot, continuing to pivot 1/3 turn to right   |
| 3               | Again cross-step with left foot in front of right foot, continuing to pivot 1/3 turn to right   |
| Essentially thi | s movement is 3 steps taken in place while executing 1 full turn to the right, finishing with weight  |
| on left foot    |   |
