## REPEAT

There is a dead spot in the music after wall 10 (you will be facing the front wall). You probably will forget by then and start the dance only to realize there's no music. This happens right after an instrumental and the singing, if any, is softer. It's a 4 count break. If you did the first rock, step, just do another set by rocking back on left and recovering to right and restart dance. Or just stop and restart when the music picks up again. You should end the dance facing the front wall on the very last step. Step forward on the left with a grand finale gesture
