[25-32]: Side Wizard Step L, ¼ Turn Hitch Step Down, Hip Bumps RR-LL

- 1,2& Angle body slightly left while stepping L to left side (1), Step/Slide R foot slightly behind L leg (2) and quickly step L foot to L side. (Angle is for sake of ease and styling only – keep your main wall as your point of reference to make the proper ¼ turn coming up.)
- 3&4 Continue down the line of dancing making ¼ turn while scuffing R foot through (3) into a R hitch (&) to complete the turn and step R foot down infront of body (4). (This will angle the body slightly to the left of the new ¼ wall because R foot is slightly forward.)
- 5-6-7-8 Bump hips forward R-R doing a full weight transfer onto forward R foot, bump hips back (you will weight transfer back onto the L) as you bump hips back L-L. Weight should finish on back L leg to free you up for the R rock/recover coming up.
