## **TAG 2**

### **On the 5th repetition of the dance**

You will dance the entire dance through the last section up to count 4 which would be the syncopated cross rock and chainé turn to the right. Leave off the syncopated cross rock and the cross unwind turn (counts 5-8) and instead just step left next to right (together) for a count of &, then start the dance over from the beginning. The very last time you do the dance the song will slow down to almost a complete stop (ritard). You will have just completed the cross unwind at the end of the sequence. Hold and raise both arms up over head slowly, then extend arms out to sides. When the beat kicks in, start the dance over one more time and you should stop facing your original starting wall by count 7 of the first set for a final pose
