## Styling Note:

The verses of this song (walls 1 and 3, counts 1-32) have a syncopated piano beat that lands rhythmically before counts 3 and 7. To match this beat, I quicken the steps before the piano beat. For anywhere you have $2 \& 3$ or 6\&7, double the speed of those counts (2e\& or 6e\&) to land on the piano beat. Anywhere you have 23 or 67 , double the speed of those counts ( $2 \&$ or $6 \&$ ) to land on the piano beat. Then slow down and wait for counts 4 and 8 . This will cause the dance to have a push and pull effect during those verses on Walls 1 and 3. Counts $33-48$ are not syncopated at all. I wrote the diagonal walk steps to help us break away from that syncopated pattern.
